DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 17 September 2003 has been entered.

Specification

2. The abstract of the disclosure is objected to because of the use of legal phraseology and idiomatic and grammatical errors. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3721

Claim 1, line 7, the language "wherein each process ..." renders the claim indefinite because the claim fails to positively set forth within the scope of the claim for which process(es) applicant seeks patent protection. The scope of the claim is ambiguous.

Claim 1, lines 13 and 14, the language "permits manual adjustment ..." renders the claim indefinite because the claim fails to positively recite the structural or mechanical relationship between the elements of the invention already set forth in the claim and any of the elements known as the "timing shaft", the "presser members" and the "support block".

Allowable Subject Matter

5. Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the attached form (PTO-892) are cited to show controllers for packaging machines. All are cited as being of interest and to show the state of the prior art.
